## Profile

Versatile Graduate Software Developer (BCS, Unitec - June 2026) with hands-on experience in full-stack web development, CRM automation, and Linux server networking. Completed an internship at ICIB Brokerweb developing workflow automation systems, and participated in the GenAI Hackathon (2024). Eager to bring a problem-solving mindset and collaborative approach to a full-time IT role.

## Experience

**ICIB Brokerweb Insurance and Risk Advisory | Hybrid** Mar 2026 - Jun 2026  
*Student Intern | Internship*

- Developed CRM system configuration and workflow automation to reduce manual document handling time for advisors.
- Presented and showcased the final capstone project (Project Rocket) to a panel of industry members at Unitec.
- Applied project management and process automation skills in a live business environment.

**ICIB Brokerweb Insurance and Risk Advisory | On-site** Nov 2023 - Feb 2024  
*Processor | Temp Contract*

- Provided data processing support to servicing brokers, ensuring accurate presentation of client insurance information.
- Communicated directly with clients to verify and complete data accurately and professionally.

**The Yummy Fruit Company | On-site** Feb 2022 - Jun 2022  
*Packhouse Worker + Tray Filler | Full-time*

## Projects

**Capstone Project | Associated with Unitec** Mar 2026 - Jun 2026  
*Project Rocket | ICIB Brokerweb Project*

- Configured and automated CRM workflows for advisors, reducing time spent on document management.
- Utilised Agile methodology and Jira Board, completing the project within the time frame and budget.
- Reduced overall manual documentation handling time by ~80%.

**Personal Project | [georgeholman.dev](http://georgeholman.dev)** May 2026 - Ongoing  
*Portfolio Website*

- Designed and built a personal full-stack portfolio using Next.js and Tailwind CSS, deployed publicly.

- Showcases projects, technical skills, and professional profile in a fully accessible, responsive layout.
- Constant improvements to adapting skills and knowledge.

### **Academic Project | React + Django REST Framework**

Oct 2025 - Nov 2025

#### *Booking Reservation Website*

- Built a full-stack booking platform with a React TypeScript front-end and Django REST Framework backend.
- Integrated Vercel server-less PostgreSQL for user and booking data with secure API authentication.
- Independently managed both front-end and back-end architecture end-to-end.
- Tested by classmates and teachers which meet the requirements of the assessment for fast and responsive website deployment.

## **Skills**
